**simplified technologies**

For immediate release February 21, 2012

We are pleased to announce:

United by a common business culture, a new alliance between TROY simplified technologies (TST) of Spring Valley and Future Communications of Peru has been completed. This merger allows the combined company to be one of the most product and resource diverse system solution providers in the region.

“By adding Future Communication’s 35 years of experience in communication systems to our capabilities we are certain we can offer customers of both companies the best service and systems available at competitive prices” remarked Chris DeArcos, TST Director of Operations.

The staff of TST are very thankful Mr. and Mrs. Kisellus, founders of Future Communications, agreed to serve as consultants while Future Communications is transitioned into the TROY simplified technologies' family. “It is a tremendous honor that Mr. and Mrs. Kisellus felt our company was the right choice to continue the 35 year history of Future Communications.” stated Troy Resetich, Owner of TROY simplified technologies.

Our expanded company offers a diverse line of technology based systems including: 2 way radio systems, video surveillance, computer network service and support, enterprise digital phone systems, and presentation/public address system design and installation.
